The Client:

Greyhound Technologies Pvt Ltd addressed the requirements of the client who is based in Australia

The Need:

Achieve higher market penetration and improve existing customer relations.

The Greyhound Analysis:

High Market penetration can be achieved through a dedicated mobile application for the enterprise.

The Greyhound Solution:

- We and came up with a feasible solution of developing the application that would run on Android Devices – Phone & Tablet, IOS/iPad.
- Application delivers brochures and technical information for most popular products in a light weight APP suitable for download to Android device, iPhone/iPad where most popular products are listed and special functionality to help user to share and save relevant documents that has been included.
- The Gas & Oil mobile application will be updated on a monthly basis, keeping you up to date on the market leading and exclusive Pipeline products.
